

## Peraqua Pool Times NEWS 2012

### AQUASTAR SafetyPack

The revolutionary and innovative back wash valve guarantees with its economic operation 12-230V/AD/CD offers best possible safety in case of power failure. With help of the high quality accumulator the valve turns to the position FILTER in case of power loss. Malfunction of the back wash valve such as draining of the pool is absolutely impossible. Die 12V 0,8 Ah accumulator is self charging, maintenance free and has capacity for up to four times power loss per hour. The valve can be operated 5 minutes by the accu. The back wash process can be activated by time and/or pressure. Serial connection of the Aquastar is possible as well as control by external PLC control. The Aquastar offers definitely a price advantage in comparison with other back wash systems and is available for all common top and side mount filter systems known in Europe, Asia, USA and Africa. Der Aquastar SafetyPack can be ordered as model 3000, 4000 and 6500 as well as assembly set for the Aquastar generation.

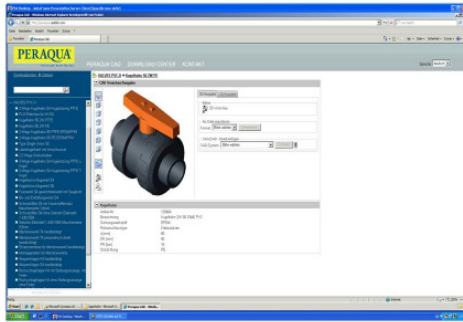

### Wafer Check Valve K6 The NEW one in the Programme of Praher

The new K6 wafer check valve impresses not only by the new design but is also a valve resistant against highest demands with an extra ordinary long life span. The K6 wafer check valve is available in DN40 – DN200 and optionally with spring. The spring can be retro fitted without additional machining. All parts of the valve are made of PVC-U and therefore extremely corrosion resistant. The valve with special assembly device can be installed in both directions – vertical and horizontal.

### CAD online at PERAQUA

The ideal software package for architects, planning offices and pool constructors is now available for download under [peraqua.cadclick.com](http://peraqua.cadclick.com). This software facilitates the planning of pipe systems for private, public and natural pool constructions. The user can choose under the specific menus either 2D or 3D views and to select and download the configuration needed. The list of compatible software and formats as well as available products can be found under the link mentioned above.

### OCEAN Stainless Steel Covers for PERAQUA White Goods

The well fitting stainless steel covers from Peraqua made of high quality stainless steel AISI316/V4 are chlorine resistant and can be retro fitted without any problems. These steel covers are an attractive and individual upgrade for any pool. Clients may choose under cover for skimmers, inlet nozzles, main drains, under water lights as well as new designed LED illumination.

### 2-Way Ball Valve S6 d75 & d90

PVC-U body, PN16, sealing material EPDM/FPM, ball seating joint made of PTFE, double shaft sealing; available in standards DIN/ASTM/JIS. Radial installation of the S6 ball valve is possible. This maintenance free valve also guarantees an extreme long life cycle.
